

COME DIG WITH US IN 2009

Crocodile fossil dig in the scenic and rugged North Dakota badlands near Medora

A 60 million year old fossil site containing crocodile, champsosaur (crocodile-like animal), turtle, and fish fossils has recently been discovered in the beautiful and rugged badlands near Medora, North Dakota. The North Dakota Geological Survey and Theodore Roosevelt Medora Foundation will co-sponsor a scientific, professionally conducted, fossil excavation at that site in June, 2009. Public participation is invited.
